Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	27 FEB 2026
Team ID	LTVIP2026TMIDS41352
Project Name	ShopEZ:One-Stop Shop for Online Purchases
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed ShopEZ solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form (Email & Password)
		Registration through Gmail
		Registration through LinkedIn
FR-2	User Confirmation	Confirmation via Email
		Confirmation via OTP
FR-3	User Login	Login using Email & Password
		Social Login (Gmail)
FR-4	Product Management	Add Product (Admin)
		Update Product Details
		Delete Product
		View Product List
FR-5	Product Search & Filtering	Search by Product Name
		Filter by Category
		Filter by Price Range
		Filter by Rating
FR-6	Cart Management	Add Product to Cart
		Remove Product from Cart
		Update Product Quantity
FR-7	Order Processing	Place Order
		Order Confirmation
		Order History
FR-8	Payment Handling	Secure Payment Processing
		Payment Status Update
FR-9	Seller Dashboard	View Orders
		Update Order Status
		Manage Inventory
FR-10	Admin Dashboard	Manage Users
		Manage Products
		View Sales Reports
FR-11	Reviews & Ratings	Add Product Review
		View Reviews

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	The system shall provide a simple, intuitive, and user-friendly interface accessible to users with basic technical knowledge.
NFR-2	Security	The system shall ensure secure authentication using JWT, password encryption, and protected API routes.
NFR-3	Reliability	The system shall handle user requests consistently without data loss or unexpected crashes.
NFR-4	Performance	The system shall load pages within 2–3 seconds under normal network conditions.
NFR-5	Availability	The application shall be available 24/7 with minimal downtime.
NFR-6	Scalability	The system shall support increasing numbers of users and products without significant performance degradation.
NFR-7	Maintainability	The codebase shall follow modular structure for easy updates and debugging.
NFR-8	Compatibility	The system shall function properly across major browsers and mobile devices.
