Velocity Calculation

Total Completed Story Points (Sprint 1 + Sprint 2 + Sprint 3):

14 + 12 + 14 = 40

Number of Completed Sprints = 3

Velocity = 40 / 3

Velocity ≈ 13 Story Points per Sprint

Burndown Chart:

A burndown chart tracks:

- X-axis → Days of sprint
- Y-axis → Remaining story points

At the beginning of sprint, total story points are highest.
Each day, as tasks are completed, remaining points decrease until reaching zero on sprint end date.
