Empathy Map Canvas:

Empathy Map – ShopEZ

User Persona: Sarah – A Busy Working Professional
Goal: To quickly purchase a meaningful birthday gift for her friend.

Empathy Map Structure

THINKS

- **Is this the right gift for my friend?**
- **Will the product match the description?**
- **Is this website secure for payment?**
- **Will the order arrive on time?**

SAYS

- **I don't have much time to search.**
- **I need something stylish and affordable.**
- **I hope the checkout process is simple.**
- **I want reliable delivery.**

DOES

- **Uses filters to narrow down product options.**
- **Reads product reviews carefully.**
- **Compares prices and ratings.**
- **Adds the selected item to the cart and completes the purchase.**

FEELS

- **Stressed because of limited time.**
- **Confused when too many options are displayed.**
- **Concerned about payment security.**

- **Relieved after placing the order successfully.**
- **Happy when the gift arrives on time.**

Insight from the Empathy Map

By understanding Sarah's thoughts, actions, and emotions, we identified the need for:

- **A simple and clean user interface**
- **Smart filtering and search functionality**
- **Secure authentication and checkout system**
- **Clear order confirmation and tracking**

This empathy mapping exercise helped us design ShopEZ based on real user needs rather than assumptions.
